

Medical RAG Test Dataset

30 questions with expected answers for evaluating retrieval and answer generation. This is a synthetic test document for RAG testing and is not medical advice.

#	Question	Expected Answer	Level
1	What is hypertension?	Hypertension is a condition in which blood pressure remains higher than the normal range.	Easy
2	What are common symptoms of hypertension?	Hypertension may have no noticeable symptoms; some people may experience headaches, dizziness, or other symptoms.	Easy
3	Why is hypertension sometimes called a silent condition?	Because many people can have high blood pressure without obvious symptoms.	Medium
4	What lifestyle changes can help control blood pressure?	Reducing salt intake, exercising regularly, maintaining a healthy weight, avoiding tobacco, limiting alcohol, and managing stress can help.	Easy
5	What is type 2 diabetes?	Type 2 diabetes is a chronic condition in which the body does not use insulin effectively, resulting in elevated blood glucose.	Easy
6	What are common symptoms of diabetes?	Increased thirst, frequent urination, increased hunger, fatigue, blurred vision, and slow-healing wounds are common symptoms.	Easy
7	What is the role of insulin?	Insulin helps glucose move from the blood into cells where it can be used for energy.	Medium
8	How can regular physical activity help people with diabetes?	Physical activity can improve insulin sensitivity and help control blood glucose levels.	Medium
9	What is asthma?	Asthma is a chronic respiratory condition involving inflammation and narrowing of the airways.	Easy
10	What symptoms are commonly associated with asthma?	Wheezing, coughing, shortness of breath, and chest tightness are common symptoms.	Easy
11	What can trigger asthma symptoms?	Triggers can include allergens, smoke, respiratory infections, exercise, and environmental irritants.	Medium
12	What is anemia?	Anemia is a condition in which the blood has insufficient healthy red blood cells or hemoglobin to carry adequate oxygen.	Easy
13	What are common symptoms of anemia?	Fatigue, weakness, pale skin, dizziness, and shortness of breath can occur.	Easy
14	Why is iron important in anemia?	Iron is needed to produce hemoglobin, which carries oxygen in the blood.	Medium
15	What is dehydration?	Dehydration occurs when the body loses more fluid than it takes in.	Easy
16	What are signs of dehydration?	Thirst, dry mouth, dark urine, reduced urination, weakness, and dizziness can be signs.	Easy

#	Question	Expected Answer	Level
17	What is a balanced diet?	A balanced diet provides appropriate amounts of carbohydrates, proteins, fats, vitamins, minerals, fiber, and fluids.	Easy
18	Why is fiber important?	Fiber supports digestive health and can help with bowel regularity and blood glucose and cholesterol management.	Medium
19	When should a person seek urgent medical attention for chest pain?	Severe or persistent chest pain, especially with shortness of breath, sweating, fainting, or pain spreading to the arm or jaw, requires urgent medical evaluation.	Hard
20	Can lifestyle changes replace prescribed medication?	Lifestyle changes can support treatment, but prescribed medicines should not be stopped or changed without advice from a qualified healthcare professional.	Hard
21	What is the difference between a symptom and a diagnosis?	A symptom is a reported or observed sign of a possible condition, while a diagnosis identifies the condition based on clinical assessment and evidence.	Medium
22	Why is medical history important?	Medical history helps healthcare professionals understand risks, previous conditions, treatments, allergies, and other factors relevant to care.	Medium
23	What is preventive healthcare?	Preventive healthcare aims to reduce the risk of disease or detect problems early through healthy habits, screening, and appropriate medical care.	Medium
24	Does the document recommend a specific antibiotic for viral infections?	Not mentioned in the document. Viral infections generally should not be assumed to require antibiotics.	Hard
25	Does the document provide a guaranteed cure for chronic diseases?	No. Chronic conditions generally require ongoing management rather than a guaranteed cure.	Hard
26	What is the purpose of diagnostic testing?	Diagnostic tests provide information that helps healthcare professionals identify, confirm, or rule out possible conditions.	Medium
27	Why should patients follow medication instructions?	Following instructions helps ensure appropriate dosing and reduces the risk of ineffective treatment or adverse effects.	Easy
28	What should a patient do before changing a prescribed medicine?	The patient should consult a qualified healthcare professional rather than changing the medicine independently.	Easy
29	What is one limitation of using a medical RAG system?	A RAG system can retrieve information from its source documents, but it should not be treated as a substitute for professional medical diagnosis or care.	Hard
30	If the answer is not present in the knowledge base, what should a good RAG system say?	It should clearly state that the information is not available or not mentioned in the provided knowledge base rather than inventing an answer.	Hard
